

Extended Reach Case Study

Disrupter® centralizers vs. Conventional centralizers

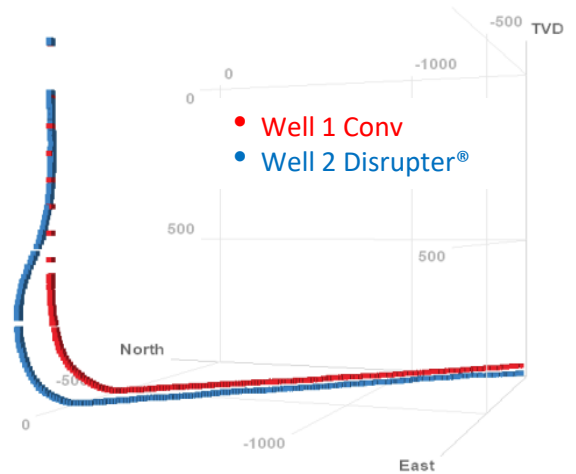

Maximized Efficiency implementing the Disrupter®

- Both wells were run 1/jt from KOP – TD
- Disrupters® well was **47%** more tortuous than offset
- Disrupters® increased run speed by **26.5%**
- Disrupters® increased available HKLD at TD by **35%**
- Disrupters® reduced FF in open hole by **25%**
- Both runs were without rotation
- Same pad, same rig

Well	TD (m)	HRS	Run Speed (m/hr)
Well 1 Conv	3,000	6.8	1,448
Well 2 Disrupter®	3,074	5	2,017

Reached TD with 35% more available HKLD and 25% less Friction than conventional centralizers
